

PRODUCT INFORMATION

OXYJON

GENERAL INFORMATION

This product is an oxygen based bleach with the ability to oxidise the heaviest of stains from all fabric types. It is better used at temperatures above 60 C where the release of oxygen will act in conjunction with other Cole & Wilson detergents, which gives the correct chemistry in safely removing stains. Oxyjon is an excellent choice with other detergents for removal of protein/tannin stains.

RECOMMENDED USAGE

Dosing levels of oxyjon will depend on the level of soiling matter but as a guideline is 2g per kg dry weight low soiling and 5-10g medium to high soiling.

PACKAGING

25 Kg woven bags
