

PRODUCT INFORMATION

SAPPHIRE PLUS

- ❖ A complete detergent powder capable of washing a wide range of classifications and soilings.
- ❖ Contains high levels of water conditioning agents to achieve the perfect wash chemistry with imperfect water conditions.
- ❖ Contains the latest bleach-stable optical brightening agent for sparkling results.
- ❖
- ❖ An easy to use free flowing powder.

BENEFITS

- ❖ Top quality whiteness and brightness.
- ❖ Compensates chemically for poor wash water quality or hardness over 60ppm (4° Clark).
- ❖ High soil suspending qualities keeps older linen whiter for longer.
- ❖ Non-caustic formulation cares for your linen and washing equipment.
 - ❖ Can be used effectively at high and low temperatures on white and coloured fabrics.

USING THE PRODUCT

This product will perform at low (40°C) medium (60°C) and high (70°C - 90°C) temperatures. One, two or three washes will be necessary according to soiling and staining levels. This is just as effective as a prewash product as it is in the hot wash stage.

Our technical staff will advise on setting up wash processes as well as as recommending suitable additional booster products for special applications. The following table gives general dosing information.
