

# SPOT AWAY 1

Betadine stain remover.

## PRODUCT

Betadine is an iodine-based antimicrobial available as an ointment, swab, tincture or skin cream. People generally use Betadine cream on minor scrapes and cuts to prevent infection. Medical professionals also use Betadine as a topical antiseptic before and during sterile surgical procedures. Like other iodine-based products, Betadine can stain the clothing.

Spot away 1 is a highly effective, ready-to-use natural solution that neutralizes Betadine and iodine-based antiseptic stains. It rapidly dissolves Betadine stains from most fabrics, including carpets, uniforms, scrubs and all clothing. Quickly removes stains from floors, tiles, countertops, tables and more.

spot away 1 is not only removes Betadine and iodine-based spills and stains, it also neutralizes the Betadine solution. It chemically transforms Betadine and other iodine-based products into water. Betadine Stain Remover breaks down Betadine spills and stains into microscopic particles that disperse and repel one another. The particles are then easy to remove and less likely to re-adhere to the cleaned surfaces. The molecular structure of these particles is so small they can forcefully penetrate molecules of daunting spills and stains for quick and easy removal.

## PRODUCT DETAILS

Description	Specification
Appearance	Liquid
Chemical nature	Anionic
pH (1% solution)	11.0 - 12.0
Solubility	Completely soluble in water
Specific gravity	1.02 - 1.03

## APPLICATION

spot away 1 requires no measuring or mixing. For laundry, use as a pre-spray, applying spot away 1 directly on stained fabric before normal washing. For carpets, upholstery and fabrics, apply it directly on stained areas. Gently scrub with a clean cloth or brush, then blot with a clean, white absorbent cloth to soak up the stain. For countertops, tile and floor surfaces, apply spot away 1 -Betadine Stain Remover directly on the stained area. After stain is neutralized, blot with a clean, white absorbent cloth and rinse with water.
