

### *Jade Wasing Up liquid*

**DESCRIPTION :** Specially formulated for effective economical hand washing of utensils or surfaces. We recommend using with a sink-dispensing unit.

**APPEARANCE:** A Yellow coloured colourless liquid detergent formulated from a specially selected blend of high foam biodegradable surfactants.

**APPLICATION:** For all washing up of any articles, surfaces, generally. The product has good grease emulsifying properties and the foam level may be used to indicate the exhaustion of the detergent efficiency, i.e. foam collapse indicates that fresh solution is needed.

#### **USE**

**CONCENTRATION:** For general washing-up and surfaces use 20-60ml per 25 litres of water (3/4 - 2 fl.ozs per 5 gallons). Sink dispensing units and automatic dosing units are better for this product.
