UNICHEM STEEL POLISH	**Steel Polish**	**750 ml**	**1030354**

Properties:
- UNICHEM STEEL POLISH is a special agent which is used for maintaining stainless surfaces.
- Removes finger prints or other marks quickly.
- Improves visual quality substantially by dispersing a glossy and shiny and protective film on stainless material.
- Applied easily and swiftly. Extends maintenance period, delaying stainless surface getting dirty.

Directions for Use:
- Surface preparation: UNICHEM STEEL POLISH has a weak cleaning property, so can remove finger prints or such marks on the surface. So there is no need to clean surface with little dirt or marks on. If the surface is dirty, it must be cleaned by a proper hard surface cleaner throughout before starting application. The surfaces should be dry.
- The bottle of UNICHEM STEEL POLISH must be shaken firmly before use.
- Applied directly by spraying a few times on the surface to be treated at a distance of 20 cm, then dipersed by wiping all over by using a piece of preferably hard cloth until getting a glossy appearance on the surface.

pH Value:
- 6.0 – 8.0

Safety Tips:
- Keep out of the reach of children.
- Avoid contact with eyes. In case of contact with eyes, rinse immediately with plenty of water and seek medical advice if necessary.
- Contains mineral oil. Proper gloves is advised to be worn during application.
- Store in a cool and dry place.

Packaging:
- 760 ml of bottle with a trigger; 12 in a carton box.
