oven, grill & brat pan cleaning chemicals - oven cleaners

thixotropic oven cleaner

heavy duty oven cleaner gel

product code	355
appearance	clear red viscous liquid
specific gravity	1.220 - 1.240 at 20°C

- ✓ extremely powerful thixotropic high cling oven cleaning gel
- ✓ high caustic content for effective removal of stubborn carbon deposits
- ✓ designed for use on professional grade ovens, grills, griddles & brat pans
- ✓ easy-to-use paint-on gel for heavy duty spot applications
- ✓ removes carbon build-up on fryer exteriors, flexi-hoses & gasket leaks

how to use

flush surface debris prior to application.
warm oven surfaces up to 110°C.

apply thixotropic oven cleaner neat, using a soft bristle nylon brush, a sponge or through a sprayer.
completely cover surface area to be cleaned.
product will start working immediately but for best results leave to act for as long as possible.
remove excess with plastic scoop and dry cloth.
afterwards, thoroughly rinse with clean hot water using abrasive pad (except on ptfе lined ovens).

depending on build up of residue, a second spot application may be required.

thixotropic oven cleaner is to be used neat, therefore appropriate personal protective clothing must be worn

do not use on aluminium, zinc, galvanised, brass and other similar metals and alloys.

Please see separate safety data sheet
